Algorithms

A set of instructions or rules written for a human to follow.

micro:bit

Algorithms

A set of instructions or rules written for a human to follow.

micro:bit

Algorithms

A set of instructions or rules written for a human to follow.

micro:bit

Algorithms

A set of instructions or rules written for a human to follow.

micro:bit

Algorithms
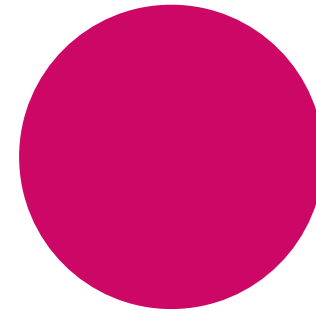

A set of instructions or rules written for a human to follow.
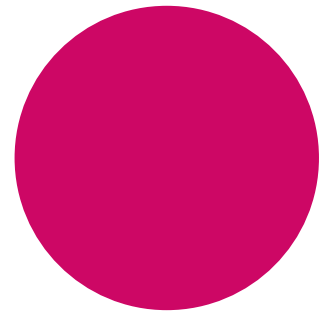

micro:bit

Algorithms

A set of instructions or rules written for a human to follow.

micro:bit

Algorithms

A set of instructions or rules written for a human to follow.

micro:bit

Algorithms

A set of instructions or rules written for a human to follow.

Bugs

An error in a computing program which results in an incorrect output

micro:bit

Bugs

An error in a computing program which results in an incorrect output

Bugs

An error in a computing program which results in an incorrect output

micro:bit

Bugs

An error in a computing program which results in an incorrect output

micro:bit

Bugs

An error in a computing program which results in an incorrect output
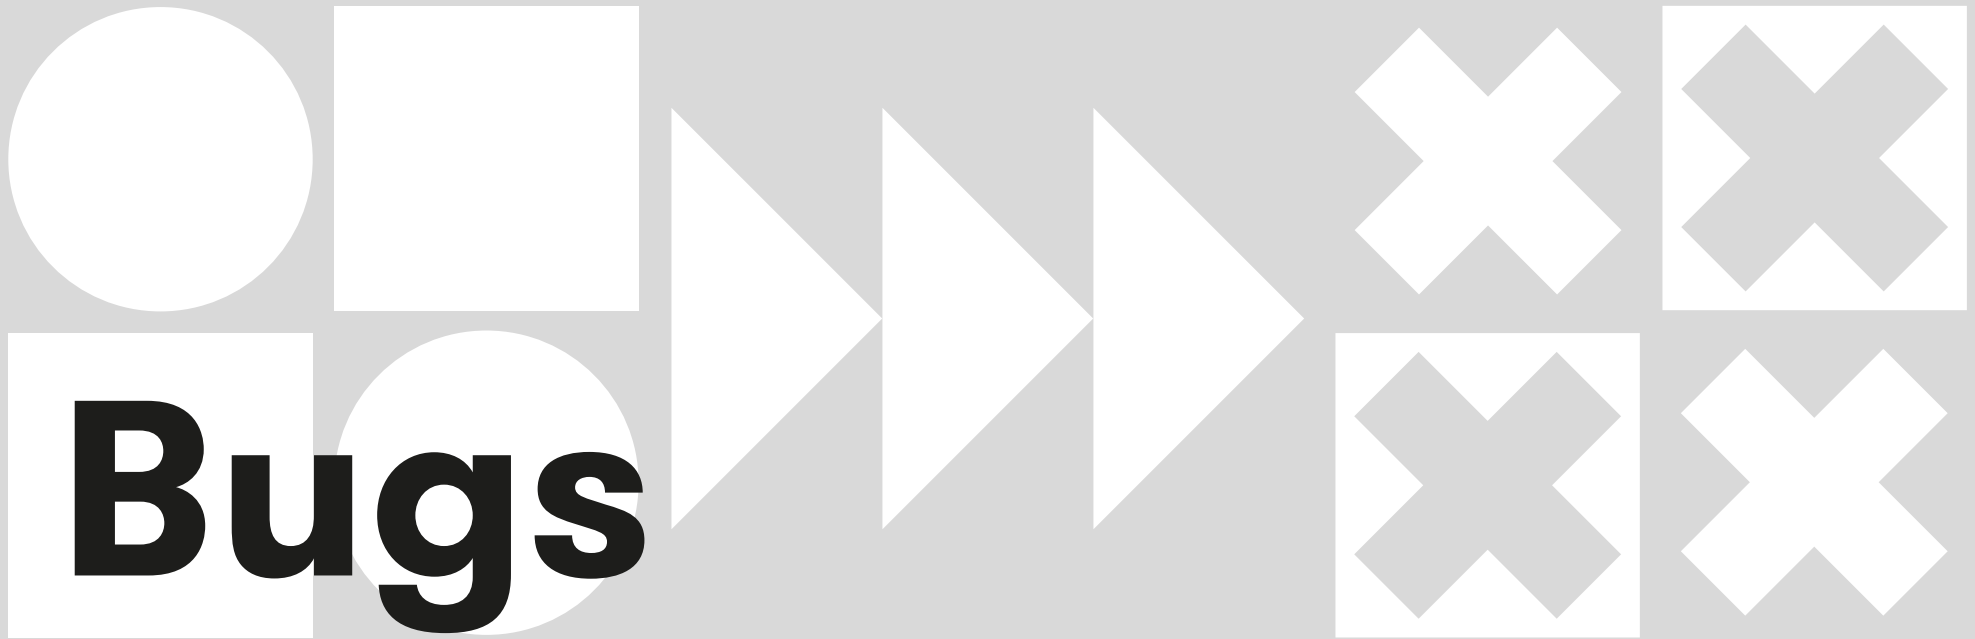

micro:bit

Bugs

An error in a computing program which results in an incorrect output

Bugs

An error in a computing program which results in an incorrect output

Bugs

An error in a computing program
which results in an incorrect output

micro:bit

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

micro:bit

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

micro:bit

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

micro:bit

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

micro:bit

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

Input devices

Devices that can be used to send data to the computer. The micro:bit buttons are input devices.

micro:bit

Output devices

Devices that can be used to present data that has been generated to a computer. The micro:bit LEDs are output devices.

micro:bit

Output devices

Devices that can be used to present data that has been generated to a computer. The micro:bit LEDs are output devices.

micro:bit

Output devices

Devices that can be used to present data that has been generated to a computer. The micro:bit LEDs are output devices.

micro:bit

Output devices

Devices that can be used to present data that has been generated to a computer. The micro:bit LEDs are output devices.

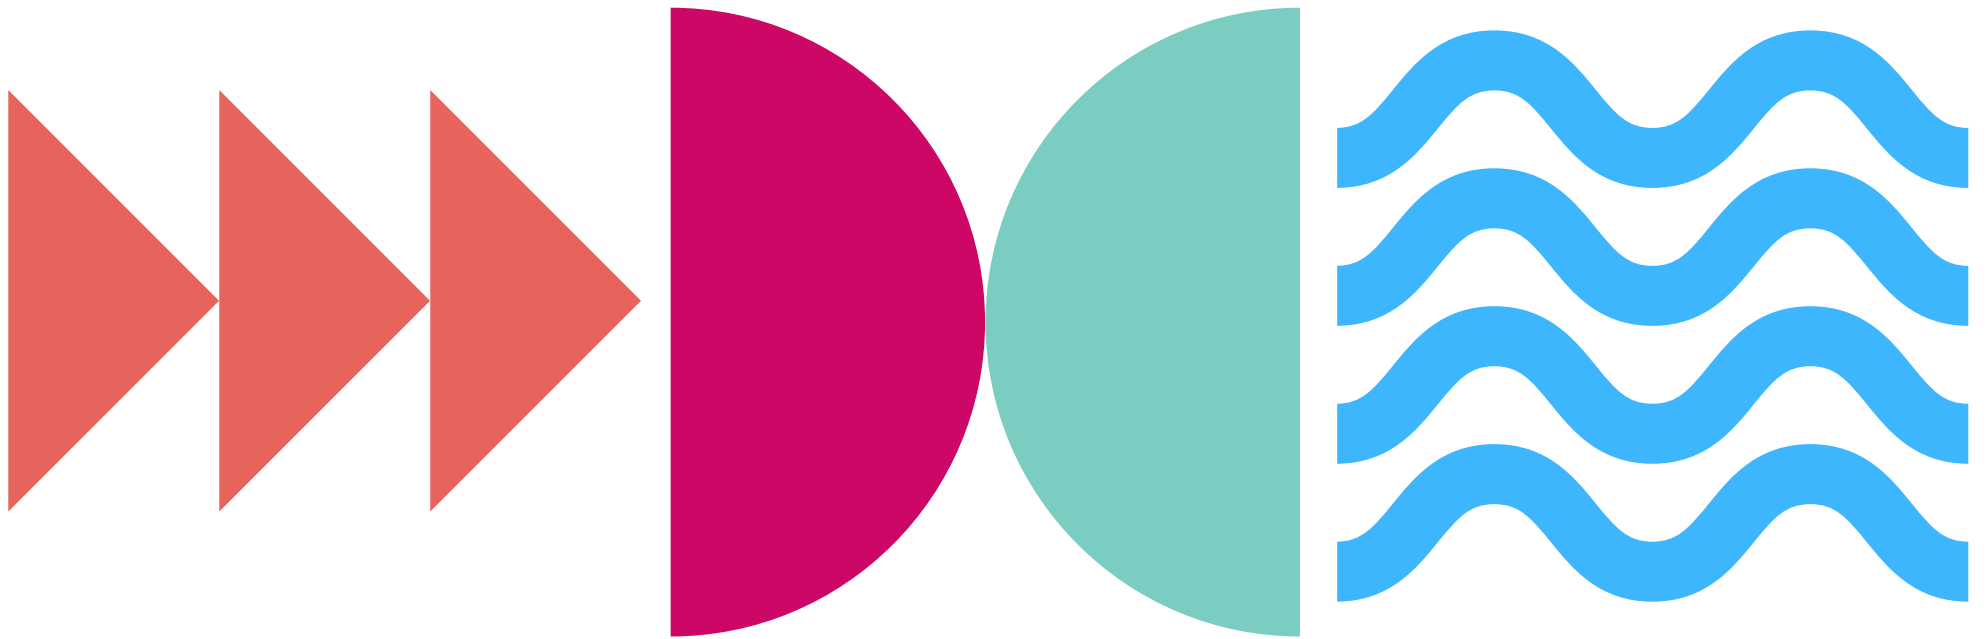

micro:bit

Output devices

Devices that can be used to present data that has been generated to a computer. The micro:bit LEDs are output devices.

micro:bit

Output devices

Devices that can be used to present data that has been generated to a computer. The micro:bit LEDs are output devices.
Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Program

A set of instructions written in a language that a computer can understand.

micro:bit

Loops

Telling the computer to do an instruction or a set of instructions more than once.
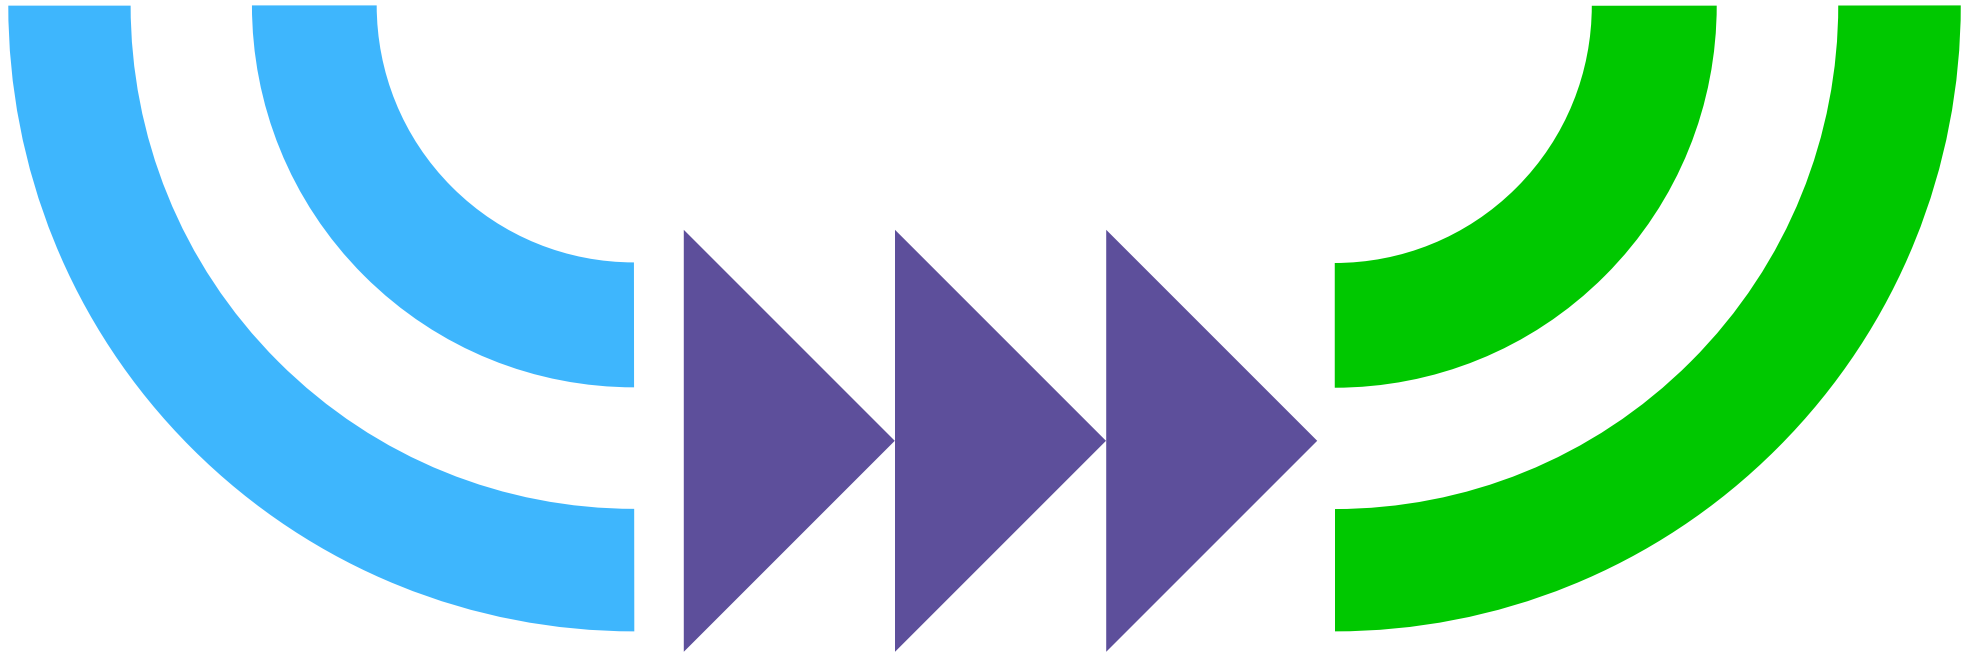

micro:bit

Loops

Telling the computer to do an instruction or a set of instructions more than once.

Loops

Telling the computer to do an instruction or a set of instructions more than once.

micro:bit

Loops

Telling the computer to do an instruction or a set of instructions more than once.

micro:bit

Loops

Telling the computer to do an instruction or a set of instructions more than once.

micro:bit

Loops

Telling the computer to do an instruction or a set of instructions more than once.

micro:bit

Loops

Telling the computer to do an instruction or a set of instructions more than once.

Loops

Telling the computer to do an instruction or a set of instructions more than once.

micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.
micro:bit

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

Selection

Telling the computer to only carry out a set of instructions if a certain condition is met.

Variables

A variable is data stored within a computer program. This data be changed, recalled or used. When the micro:bit counts the steps you have taken, a variable is being used.

micro:bit

Variables

A variable is data stored within a computer program. This data be changed, recalled or used. When the micro:bit counts the steps you have taken, a variable is being used.

micro:bit

Variables

A variable is data stored within a computer program. This data be changed, recalled or used. When the micro:bit counts the steps you have taken, a variable is being used.
micro:bit

Variables
